Trailer Dynamics GmbH is very delighted that PEM Aachen GmbH has become shareholder of Trailer Dynamics GmbH. In a first step PEM Aachen GmbH has signed a stake of 5% of the shares of Trailer Dynamics GmbH, with the option to extend it to a 25% shareholding.

Trailer Dynamics especially offers the Newton eTrailer, a comprehensive manufacturer independent solution concept for long haul trucks by adding/establishing an additional electric drivetrain into the trailer, reducing diesel consumption and CO_2 emission significantly, recuperating energy and managing the electrical energy resources along the entire route.

PEM Aachen GmbH is the holding entity of PEM Motion GmbH an engineering service provider with consulting and development solutions focusing on batteries, fuel cells and electric motors as well as the industrialization of mobility products.

The Owners and Managing Directors of Trailer Dynamics GmbH Abdullah Jaber and Michael Nimtsch are very pleased about this important and forward looking step to be able to expand the shareholder base by PEM Aachen

GmbH. The participation of PEM Aachen GmbH and its shareholder Prof. Achim Kampker enables Trailer Dynamics a very close technological exchange and cooperation with PEM Motion, Prof. Achim Kampker, his team and the RWTH Aachen University will provide access to expertise knowledge and highly qualified and competent engineers. This step will appreciably underline the position of Trailer Dynamics as frontrunner in the area of electrified long haul trailers.

The shareholders of PEM Aachen GmbH Prof. Kampker and Christoph Deutskens welcome Trailer Dynamics GmbH to their network. As pioneers in the field of future mobility, PEM Aachen GmbH is constantly looking for innovative partners. Our focus, not only to revolutionise private mobility, but especially in the field of logistics to bring practical, efficient and resource-saving solutions on the road, is clearly reflected in our network.

From the development of the StreetScooter, our starting point, to Ducktrain, a start-up that develops semi-autonomous light vehicles in the field of last-mile logistics - from projects in the field of electrification and the development of new drive train concepts, to consulting projects in the field of e-motors and batteries - PEM Aachen GmbH is a network of companies and bundles know-how from research and practice for a successful and sustainable future of mobility.

With the investment in Trailer Dynamics GmbH, PEM Aachen GmbH now complements its range of sustainable logistics solutions with a strong partner in long-distance logistics.

We look forward to working together to achieve the next milestones for cleaner and more sustainable mobility.
